ABOUT ME

Aspiring software developer with hands-on experience in React, Node.js, and Android. Passionate about UI/UX and building efficient web and mobile applications. Quick learner eager to contribute to impactful tech projects.

Languages: Spanish and English

EDUCATION

Computer Systems Engineering

Instituto Tecnológico de Ciudad Madero (ITCM)

September 2020 - Present

Cd. Madero, Tamps

- **Relevant coursework:** Introduction and OOP with Java, introduction to databases, data structures, Android Studio with Java and Kotlin, Jetpack Compose, implementation of CRUD systems, algorithm design, artificial intelligence.

Programming Technician

CBTis 103

August 2017 - August 2020

Cd. Madero, Tamps

- **Relevant coursework:** Introduction to PSeInt, C#, web development (HTML, CSS), and Android Studio with Java.

SKILLS

Programming Languages: Java, Kotlin, TypeScript, JavaScript.

Web & Mobile Development: React, Vue, Svelte, AstroJS, Jetpack Compose.

Backend & APIs: Node.js, Express, Flask, REST API.

Databases & Tools: SQL, Docker, Git, Linux.

PROJECTS

SolidKey | *TypeScript, Express, React, Git*

Developed a secure password manager api with encryption techniques. Key features include:

- **Custom password generation:** Developed a flexible generator with configurable security options.
- **State management with React Context API:** Optimized user interactions and performance.
- **Token decoding and validation API:** Strengthened password security through robust authentication.

SmartNote | *AstroJS, Flask, WebSocket, Git*

Built an AI-powered note-taking app with real-time classification. Key features include:

- **Real-time content classification:** AI model for instant note categorization.
- **WebSocket integration:** Ensured seamless real-time updates between frontend and backend.
- **Flask API for AI processing:** Designed a scalable backend for intelligent note organization.
